

Cat[®] 14M Motor Grader Die-Cast Model From Norscot Features Latest Trade Dress

A dramatic new 1:50 scale die-cast replica of the Cat[®] 14M motor grader combines the exceptional detail that collectors have come to expect in Norscot Scale Models with the recently unveiled Caterpillar[®] Power Edge[™] trade dress design.

“Die-cast collectors have a once-in-a-lifetime opportunity to get in on the ground floor of Caterpillar’s sweeping transition to its new trade dress,” said Scott Stern, Norscot president and chief executive officer. “With the bold red slash highlighting the Cat logo, the Power Edge dress makes a dramatic statement.”

The 14M scale model is also particularly notable for replicating Caterpillar’s new M Series motor graders, which were introduced to the construction market in late 2006. The visually striking M Series machines have a

revolutionary joystick control system instead of the traditional steering wheel and levers, as well as a new cabin design with enhanced operator sight lines. These details are clearly visible in the Norscot model.

Other features of the model include:

- Moveable drawbar, circle and moldboard
- Front wheel steering and axle articulation
- Rear frame articulation
- Oscillating tandem rear wheels
- Operating rear ripper

Item Number 55189 is 8-1/2 inches long, 3-3/8 inches wide and 2-3/4 inches high (21.59 x 8.57 x 6.99 cm).

Caterpillar models made by Norscot are available at participating Cat dealers and at retailers throughout the world.
